¹ Outdoor essentials list can be carried in a daypack.

² 1L Nalgene bottles work great.

³ Useful for a day hike – but remember never to bring food into the sleeping area.

⁴ It can be assumed for this type of camping that the sleeping bag and pad will not be carried very far, so they do **not** need to be the compact, light, and expensive backpacking variety. Any low cost big-box store bag and pad will do.

⁵ To be checked in with Scoutmaster or designated adult. Must be in original prescription bottle.
